Assignment 4
Descriptive Cataloging: Implementing RDA
(Due: March 6, 2019)

Answer Key

4. Annotate how each of 10 highlights in the lecture note, "Implementing RDA" posted for weeks 7 are reflected in the record you printed out. In the annotation, please include applicable RDA sections and explain how MARC record is created.
1. One of the ways to spot an RDA record is in the MARC 040 tag. This tag in MARC represents the cataloging source – it is used to indicate the organization that created the original record, assigned the MARC content designation, or modified an existing MARC record. An RDA record can also be spotted by an “i” next to *desc* in the fixed field. The “\$e” indicates the description conventions in MARC. (The multiple “\$d” indicate modifying agencies. Tag 040 is required in the creation of a MARC record.)
 2. Tags 245, 250, 264, 300, 337, and 338 all indicate core or core-if fields. Under RDA 0.6.2 the core fields are Title proper (RDA 2.3.2) (245 in MARC) (created using the title on the verso), Designation of edition (RDA 2.5.2) (250 in MARC), Media type (RDA 3.2) (337 in MARC), Carrier type (RDA 3.3) (338 in MARC). Place of publication (RDA 2.8.2), publisher’s name (RDA 2.8.4), and date of publication (RDA 2.8.6) (all MARC 264) are all core-if fields. The core fields are technically required to create a MARC record, and the core-if fields are required if they are applicable.
 3. This highlight uses the principles of representation (RDA 0.4.3.4) to utilize how the materials describes itself on its title page/verso to use when cataloging. This information is represented in tags 100, 245, 250, and 264. Since RDA transcribes from what you see (see highlight #4) it utilizes what the object presents in terms of data for description and MARC record creation purposes. All of the fields listed are required for the creation of a MARC record.
 4. RDA (2.8.1.4) asks catalogers to transcribe rather than record, so in tags 245, 250, and 264 we directly transcribe the title (Cataloging and classification: an introduction), designation of edition (Fourth edition.), place of publication (Lanham, Maryland), publisher’s name (Rowman & Littlefield Publishers), and date of publication ([2016]).
 5. MARC tag 300 represents the physical description of our book. It begins by listing “xviii” – the number of chapters in our book, 784 pages (RDA does not abbreviate pages RDA 7.15.1.3), lists that the book has illustrations, and ends with the measurement of the book.
 6. Carrier Type (MARC 338) (RDA 3.3), Content Type (MARC 336) (RDA 6.9), and Media Type (MARC 337) (RDA 3.2) are all RDA terminology. These tags are optional in the creation of a MARC record, however, if these tags are used the field is filled in with the corresponding RDA data element vocabulary.
 7. MARC tag 264 is used rather than tag 260 for production, publication, distribution, manufacture, and copyright data information. Represented in our record is publication (Tag Field 264 _1 (RDA 2.8.2) place of publication (Lanham, Maryland), (RDA 2.8.4) publisher’s name (Rowman & Littlefield Publishers), and date of publication ([2016]) (RDA 2.8.6) (all of the previous listed data elements are core in RDA) and copyright notice date (264 _4 \$c 2016) (RDA 2.8.6) information.
 8. Our record shows the statement of responsibility in MARC field 245 (RDA 2.4.2) as Lois Mai Chan and Athena Salaba. In MARC field 100 (used for the Main Entry of Personal Names, the person most responsible for the work) there is also a statement of responsibility with added relationship designator (RDA I.2.1) (in this case “\$e author”) (\$e is a relator term describing how the person is related to the work). Additionally, MARC tag 776 allows the record to relay a further statement of responsibility in our record.

9. Carrier Type (MARC 338) (RDA 3.3) is listed as volume, Content Type (MARC 336) (RDA 6.9) is listed as text, and Media Type (MARC 337) (RDA 3.2) is listed as unmediated. Again, these fields are optional in the creation of a MARC record, but utilize RDA specific vocabulary only if they are included.
10. RDA does not require the usage of indicators such as ISBD punctuation (RDA 0.1), but libraries may use this punctuation in their MARC records on display.

5. Specify the meaning of the **content designators** (i.e., the tags, indicators, and subfield codes). You may want to consult “MARC 21 (<https://www.loc.gov/marc/bibliographic/>) or OCLC’s “Bibliographic Formats and Standards (<http://www.oclc.org/bibformats/default.htm>).” (Highlights indicate a group of tags described en masse under the last tag in the group. – KB)

007 t \$b a

- Tag 007 is Physical Description Fixed Field-General Information (R).
- The “t” indicates the material is a text material.
- The delimiter \$ followed by a subfield code “b” indicates the material is in large text.
- The subfield code “a” indicates the book is also in regular text.

010 2015028244

- This tag (010) indicates the Library of Congress Control Number (NR) as 2015028244.

040 DLC \$b eng \$e rda \$c DLC \$d YDX \$d YDXCP \$d OCLCF \$d USU \$d SDS \$d CDX \$d ILI \$d MNE \$d CHVBK \$d XXWGB \$d LRP \$d WYZ \$d OCLCQ \$d ICL \$d OCLCQ \$d FC@ \$d OCLCO \$d OCLCA \$d GILDS \$d CD5 \$d OCLCO \$d DUNPL \$d TYC \$d OCLCQ \$d PAU \$d OCLCO \$d OCLCQ \$d OCLCO \$d FB3 \$d OCLCO \$d UBC \$d OCLCO \$d WID \$d OCLCO \$d OCLCQ \$d VOD \$d OCLCO \$d OCLCQ \$d OCLCO \$d OCLCQ \$d OCLCO \$d FBR \$d KSU \$d OCLCQ \$d OCLCO \$d FCB \$d OCLCO \$d PBF \$d CRP \$d CNCGM \$d OCLCO \$d EUQ \$d OCLCO \$d UKMGB \$d ESU \$d OCLCA \$d GDC \$d OCLCQ \$d OCLCO \$d OCLCQ \$d AZU

- The 040 tag indicates the Cataloging Source. DLC is initially listed which is the Library of Congress’ Organization code. The delimiter \$ followed by a subfield code “b” indicates the language of cataloging (in this case, English) and the delimiter \$ followed by a subfield code “e” indicates the description conventions used (in this case, RDA). The delimiter \$ followed by a subfield code “d” followed by organization codes indicates a modifying agency (the multiple organizations that have modified the record in some form either via cataloging, content designation, keying changes, etc.)

015 GBB5F8508 \$2 bnb

- Tag 015 indicates the National Bibliography Number (R). The subfield code \$2 indicates the source, and the “bnb” is the National Bibliography Number Source Code for the British National Bibliography.

016 7_ 017603281 \$2 Uk

- Tag 016 indicates the National Bibliographic Agency Control Number (R). Next to the tag there is an indicator of “7_” which indicates that the source is specified in subfield \$2. The control number is listed as 017603281 and the “\$2 Uk” indicates that the source is the British Library (Code: Uk).

019 920853683 \$a 927398464 \$a 931998903 \$a 1074481724

- Tag 019 indicates the OCLC Control Number Cross-Reference (NR). Each subfield of “\$a” followed by a number indicates the control number of a duplicate record that was merged and deleted from WorldCat. This is not a standard MARC tag.

020 9781442232488 \$q (cloth ; \$q alk. paper)

020 144223248X \$q (cloth ; \$q alk. paper)

020 9781442232495 \$q (pbk. ; \$q alk. paper)

020 1442232498 \$q (pbk. ; \$q alk. paper)

020 \$z 9781442232501 \$q (electronic)

- Tag 020 indicates the International Standard Book Number (R) or ISBN. The subfield code \$q indicates qualifying information (in this case cloth and alk. Paper). The subfield code \$z indicates an ISBN that has been cancelled, such as the electronic one to the left.

042 pcc

- Tag 042 indicates the Authentication Code (NR). This is an agency specific code that indicates that a record has been reviewed in a certain manner. The "pcc" indicates that the record has been reviewed by the Program for Cooperative Cataloging.

050 00 Z693 \$b .C437 2016

- Tag 050 indicates the Library of Congress Call Number (R). The indicators after the tag (00) describe the following: first indicator of 0 describes that the item is in the Library of Congress, the second indicator of 0 notes that it was assigned by the Library of Congress. The \$b subfield code indicates the item number to distinguish the item from other items with the same call number.

060 _4 Z693 \$b .C437 2016

- Tag 060 indicates the National Library of Medicine Call Number (R). The indicator after the tag (_4) describes the following: second indicator of 4 describes that the call number source is from an agency other than the National Library of Medicine.

082 00 025.3 \$2 23

- Tag 082 indicates the Dewey Decimal Classification Number (R). The indicators (00) after the tag describe the following: first indicator: this describes the type of edition used (full or abridged), the 0 indicates that the full edition was used, second indicator: this describes the source of the classification number as either the LoC or another organization, the 0 indicates the number was assigned by the LoC. The subfield code of \$2 indicates the edition of the Dewey classification from which the number was assigned. In this case, it's the 23rd edition.

084 UL631 \$2 kktb

- Tag 084 indicates Other Classification Numbers (R). The subfield code of \$2 indicates the "number source". This is the MARC code for classification system being used to produce the number. The code is kktb for the Kokuritsu kokkai toshokan bunruihyo = National Diet Library classification (Tokyo: National Diet Library).

084 UL651 \$2 kktb

- Tag 084 indicates Other Classification Numbers (R). The subfield code of \$2 indicates the "number source". This is the MARC code for classification system being used to produce the number. The code is kktb for the Kokuritsu kokkai toshokan bunruihyo = National Diet Library classification (Tokyo: National Diet Library).

092

- Tag 09X leaves a spot for Local Call Numbers. In this case, there are none.

049 NLSA

- Tag 049 indicates the holding library code. It is not part of the standard MARC format. The org code listed may belong to the National Library of South Africa.

100 1_ Chan, Lois Mai, #e author.

- Tag 100 is the Main Entry-Personal Name (NR). The first indicator (1) indicates the type of personal name entry format, in this case 1 means that the surname is first. The subfield code of \$e indicates the relator term, or how the person is related to the materials, in this case Chan, Lois Mai is the author.

245 10 Cataloging and classification : #b an introduction / #c Lois Mai Chan and Athena Salaba.

- Tag 245 represents the Title Statement (NR). The indicators after the tag (10) describe the following: the first indicator indicates a title added entry (the desired title is the same one being used in field 245), for this record we have the 1 for "added entry", the second indicator describes nonfiling characters (no character positions are disregarded), for this record we have a 0 for "no nonfiling characters".
- Subfield code \$b indicates the remainder of the title.
- Subfield code \$c indicates the statement of responsibility.

250 Fourth edition.

- Tag 250 indicates the Edition Statement (R). There are no subfield codes on this record.

260 #c 2016

- Tag 260 describes the Publication, Distribution, etc. (Imprint) (R) information. The subfield code of \$c describes the Date of publication, distribution, etc. In our record here, it is 2016.

264 _1 Lanham, Maryland : #b Rowman & Littlefield Publishers, #c [2016]

264 _4 #c ©2016

- Tag 264 describes the Production, Publication, Distribution, Manufacture, and Copyright Notice (R). The first indicator on both lines of the 264 tag is blank, but the second indicator on both lines contains data. This indicator describes the function of the entity.
- On the first line featuring the 264 tag, the second indicator is 1. This means that what follows is a statement relating to publication (or release or issue) of the materials. The place of publishing (Lanham, Maryland), followed by a \$b subfield code describing that the name of the publisher (or distributor, manufacturer, or producer) will follow, the subfield code \$c describes the date of production, publication, distribution, manufacture, or copyright notice.
- On the second line featuring the 264 tag, the second indicator is 4. This means that what follows is a statement relating to the copyright notice date. The subfield code \$c describes the date of production, publication, distribution, manufacture, or copyright notice.

300 xviii, 784 pages : #b illustrations ; #c 24 cm

- Tag 300 describes the Physical Description (R) of the materials. There are no indicators for this tag. Subfield code \$b precedes other physical details of the material such as illustrations or coloration information. Subfield code \$c precedes the dimensions of the materials which can be expressed in centimeters, millimeters, or inches.

336 text #b txt #2 rdacontent

- Tag 336 describes the Content Type (R). Subfield code \$b describes the content type code (txt), and subfield code \$2 describes the MARC code for the source of the term or code used to create the content type code (rdacontent).

337 unmediated \$b n #2 rdamedia

- Tag 337 describes Media Type (R). Subfield code \$b describes the media type code (n for unmediated), and subfield code \$2 describes the MARC code for the source of the term or code used to create the content type code (rdamedia).

338 volume \$b nc #2 rdacarrier

- Tag 338 describes Carrier Type (R). Subfield code \$b describes the media type code (nc), and subfield code \$2 describes the MARC code for the source of the term or code used to create the content type code (rdacarrier).

520 "The fourth edition of the late Lois Mai Chan's classic Cataloging and Classification covers the analysis and representation of methods used in describing, organizing, and providing access to resources made available in or through libraries. Since the last edition published in 2007, there have been dramatic changes in cataloging systems, the most notable being the shift from AACR2 to Resource Description and Access (RDA) as the new standard developed by the Library of Congress. With the help of Athena Salaba, this text is modified throughout to conform to this new standard"-- \$c Provided by publisher.

- Tag 520 describes the Summary. This is used to describe the scope of the materials. The subfield code \$c indicates the assigning source of the information supplied in this field.

504 Includes bibliographical references (pages 755-769) and index.

- Tag 504 is the Bibliography, Etc. Note (R). This tag is for information that describes the existence of bibliographic references in the material.

505 0_ Part 1. Introduction. Information resource management: description, access, organization -- Foundations, principles, conceptual models, and standards of resource description -- Part 2. Record production and structure, encoding formats, and metadata records. Records and encoding schemas -- Metadata schemas -- Part 3. Resource description and access (RDA). RDA and its foundations -- Resource description and access: identifying -- Resource description and access: identifying works and expressions -- Resource description and access: identifying persons, corporate bodies and families -- Resource description and access: recording relationships -- Part 4. Subject access and controlled vocabularies. Principles of controlled vocabularies and subject analysis -- Library of Congress subject headings -- FAST (Faceted Application of Subject Terminology) -- Sears list of subject headings -- Medical subject headings -- Part 5. Organisation of library resources. Classification and categorization -- Dewey decimal classification -- Library of Congress classification -- National Library of Medicine classification and other modern classification schemes.

- Tag 505 is the Formatted Contents Note (R). This describes the titles of parts of an item or its table of contents. Only the first indicator is listed and it translates to display constant controller. This controls the generation of an intro phrase. The indicator is 0 which translates to contents (complete contents of the item).

630 00 Resource description & access.

630 07 Resource description & access. #2 fast #0 (OCOLOC)fst01791077

- Tag 630 describes the Subject Added Entry-Uniform Title (R). This is the subject entry in which the entry element represents a uniform title.
- Tag 630 line one has two indicators (00). The first indicator (0) represents nonfiling characters (no character positions disregarded). The second indicator is thesaurus (subject heading system or thesaurus used to create the subject heading). The 0 represents the Library of Congress Subject Headings (LCSH).

- Tag 630 has two indicators as well (07). The first indicator (0) represents nonfiling characters (no character positions disregarded). The second indicator is “source specified in subfield \$2”. There are two subfield codes: \$2 is described as the source of heading or term, and \$0 is described as authority record control number or standard number (R).

610 27 Amerika Haus Berlin \$b Video Lending Library \$2 gnd \$0 (DE-588)5225813-0

- Tag 610 describes Subject Added Entry-Corporate Name (R). The field has two indicators (27), the first indicator (type of corporate name entry element), 2, represents the name in direct order, the second indicator (subject heading system or thesaurus used to create the subject heading), 7, represents that the source specified in subfield \$2.
- The subfield code \$b represents the subordinate unit, \$2 represents the actual source of the heading or term, and the subfield code \$0 represents the authority record control number or standard number (R).

650 _0 Cataloging.

650 _0 Classification \$x Books.

- Subfield code \$x is general subdivision (indicating a subject subdivision corresponding to other subfields.)

650 _2 Cataloging. \$0 (DNLM)D002376

- Subfield code \$0 is authority record control number or standard number (the control number of a related authority or classification record).

650 _2 Book Classification. \$0 (DNLM)D001867

- Tag 650 is for Subject Added Entry-Topical Term (R). Each line tagged with 650 has no first indicators listed, but each has a second. The second indicator (subject heading system or thesaurus used to create the subject heading) of 0 is Library of Congress Subject Headings, 2 is Medical Subject Headings, and 7 is source specified in subfield \$2. Each subfield code will be explained under each line to the left.

- Subfield code \$0 is authority record control number or standard number (the control number of a related authority or classification record).

650 _7 Cataloging. \$2 fast \$0 (OCOLOC)fst00848659

- Subfield code \$2 is the source of the heading or term the MARC code for the source of the term or code used to create the subject entry.
- Subfield code \$0 is authority record control number or standard number (the control number of a related authority or classification record).

650 _7 Classification \$x Books. \$2 fast \$0 (OCOLOC)fst00863572

- Subfield code \$x is general subdivision (indicating a subject subdivision corresponding to other subfields.)
- Subfield code \$2 is the source of the heading or term the MARC code for the source of the term or code used to create the subject entry.
- Subfield code \$0 is authority record control number or standard number (the control number of a related authority or classification record).

650 _7 Klassifikation \$2 gnd \$0 (DE-588)4030958-7

- Subfield code \$2 is the source of the heading or term the MARC code for the source of the term or code used to create the subject entry.
- Subfield code \$0 is authority record control number or standard number (the control number of a related authority or classification record).

650 _7 Katalogisierung \$2 gnd \$0 (DE-588)4163418-4

- Subfield code \$2 is the source of the heading or term the MARC code for the source of the term or code used to create the subject entry.
- Subfield code \$0 is authority record control number or standard number (the control number of a related authority or classification record).

650 _7 Inhaltserschließung \$2 gnd \$0 (DE-588)4120490-6

- Subfield code \$2 is the source of the heading or term the MARC code for the source of the term or code used to create the subject entry.
- Subfield code \$0 is authority record control number or standard number (the control number of a related authority or classification record).

700 1_ Salaba, Athena, \$e author.

- Tag 700 is Added Entry-Personal Name (R). This represents an additional name associated with the record. The first indicator (type of personal name entry) of 1 represents the surname. There is no second indicator. The subfield code of \$e indicates the relator term, or how the person is related to the materials (in our case, this person is an additional author).

776 08 \$i Ebook version : \$z 9781442232501

- Tag 776 is Additional Physical Form Entry (R). This details information concerning additional physical forms of the material that is available. The first indicator (note controller), 0, translates to display note (or this field note is okay to display). The second indicator (display constant controller), 8, translates to no display constant generated. This hands off additional information regarding display constant to the subfield codes.
- The subfield code \$i provides relationship information (R), and the code \$z provides the International Standard Book Number (R).

938 Coutts Information Services \$b COUT \$n 26441438

938 YBP Library Services \$b YANK \$n 12518724

938 YBP Library Services \$b YANK \$n 12518723

- Tag 938 is Vendor-Specific Ordering Data (R). This field relies on vendor records/information from OCLC. This is not a standard MARC tag.
- Subfield code \$b is the OCLC defined symbol or code for the vendor.
- Subfield code \$n is the vendor control number (used by all institutions).

029 1_ CHVBK \$b 35578503X

029 1_ CHVBK \$b 375154906

- Tag 029 is Other System Control Number (R). This is a tag used by OCLC to track records from non-OCLC system records. This is not a MARC standard tag.

- The first indicator (type of system control number), 1, is the secondary control number. There is no second indicator.
- Subfield code \$b represents the system control number to follow.

6. Explain how each **data element** was constructed, using RDA (and ISBD). (**Highlights indicate a group of tags described en masse under the last tag in the group. – KB**)

020 #z 9781442232501 #q (electronic)

- The RDA equivalent data element for MARC tag 020 is Identifier for Manifestation (RDA 2.15). These are characters that seek to differentiate the material from other materials. In this case, an ISBN. In RDA, the subfield

code of \$q does not have an equivalent data element. However, the subfield code of \$z falls under Identifier for Manifestation (RDA 2.15) as well.

- The ISBD equivalent data element for MARC tag 020 is the -Note on Resource Identifier and Terms of Availability (ISBD 7.8). This is a note relating to the resource identifier and terms of the item's availability. In this case, the ISBN and available format of the material (paper and electronic).

100 1_ Chan, Lois Mai, †e author.

- The RDA equivalent data element for MARC tag 100 is Creator or Other Agent Associated with Work (RDA 19.2 or 19.3). As Lois Mai Chan is the first name associated with our book, this record uses the RDA data element for Creator (RDA 19.2). The next RDA element uses the first indicator (1) combined with the subfield code of \$e to produce the data element of Relationship Designator (RDA 18.5). This is how we arrive at "author" next to the \$e subfield code.
- There is no ISBD equivalent data element for this particular entry.

245 10 Cataloging and classification : †b an introduction / †c Lois Mai Chan and Athena Salaba.

- The RDA equivalent data element for MARC tag 245 is not a direct mapping of MARC to RDA data elements, but a mapping that takes the usage of the subfield codes into consideration. The data element equivalent for the \$b subfield code within the 245 field is Other Title Information (RDA 2.3.4). This describes other information that is next to the title. The subfield code \$c equates to RDA data element Statement of Responsibility Relating to Title Proper (RDA 2.4.2). This is information related to the agents responsible for the creation of the title work.
- The ISBD equivalent data element for MARC tag 245 field information also takes the same components into consideration as RDA. In ISBD, the data element that is constructed from subfield code \$b is -Other title information (ISBD 1.3). This only takes the phrase that appears after the title into consideration.

250 Fourth edition.

- While there is no subfield code associated with MARC tag 250, arguably this field corresponds to the RDA data element Designation of Edition (RDA 2.5.2) as it has the word “edition” after the word “fourth” thus identifying the material’s edition.
- In the same vein, this field could correspond to Edition statement (ISBD 2.1).

260 \$c 2016

- The subfield code of \$c next to MARC tag 260 maps to the RDA data elements Copyright Date (RDA 2.11), Date of Distribution (RDA 2.9.6), Date of Publication (RDA 2.8.6), and Date of Production (RDA 2.7.6). As just the year is listed, it is safe to assume the year corresponds to all of the data elements. This is the date in which the book was inscribed, fabricated, etc. but in an unpublished format.
- The ISBD equivalent data element is Date of publication, production and/or distribution (ISBD 4.3). This is the year in which the book was officially distributed to the public.

264 _1 Lanham, Maryland : \$b Rowman & Littlefield Publishers, \$c [2016]

264 _4 \$c ©2016

- Since the second indicator in the first field of MARC tag 264 is 1, the subfield code of \$b maps to the RDA data element Publisher’s Name (RDA 2.8.4) (there is no other publisher name listed, nor is it in another language, so it maps to this particular data element). The subfield code of \$c maps to Date of Publication (RDA 2.8.6). Since the second indicator in the second field of MARC tag 264 is 4, the subfield code of \$c refers to the Copyright Date (RDA 2.11).
- The ISBD data element equivalents are Name of publisher, producer and/or distributor (ISBD 4.2) and Date of publication, production and/or distribution (ISBD 4.3). ISBD 4.3 encompasses copyright date and date of publication.

300 xviii, 784 pages : \$b illustrations ; \$c 24 cm

- The RDA data element used in this MARC tag 300 field for subfield code \$b is Illustrative Content (RDA 7.15). All of the other data elements that could be used for this subfield code are related to other formats that our book is not in. This book does have illustrations. The data element that corresponds for subfield code \$c is Dimensions (RDA 3.5).
- The ISBD data element equivalent is Presence of illustrations (ISBD 5.2.3) for subfield code \$b and Dimensions (ISBD 5.3).

336 text \$b txt \$2 rdacontent

- This is a MARC tag field that is RDA specific and refers to Content Type (RDA 6.9). This field is created by using terms listed under RDA 6.9.1.3.
- This tag and RDA equivalent maps to ISBD element Content form (ISBD 0.1). This is the “fundamental form or forms in which the content is expressed”.

337 unmediated \$b n #2 rdamedia

- This is a MARC tag field that is RDA specific and refers to Media Type (RDA 3.2). This field is created by using terms listed under RDA 3.2.1.3.
- This tag and RDA equivalent maps to ISBD element Media type (ISBD 0.2). This is "A category that records the type or types of carrier used to convey the content."

338 volume \$b nc #2 rdacarrier

- This is a MARC tag field that is RDA specific and refers to Carrier Type (RDA 3.3). Carrier type refers to the format of the medium and housing of the materials. This field is created by using terms listed under RDA 3.3.1.3. (For this book, since it is listed as unmediated in tag 337, the only term that matches in RDA 3.3.1.3 is volume.)
- There is no ISBD data element equivalent for this particular RDA data element.

520 "The fourth edition of the late Lois Mai Chan's classic Cataloging and Classification covers the analysis and representation of methods used in describing, organizing, and providing access to resources made available in or through libraries. Since the last edition published in 2007, there have been dramatic changes in cataloging systems, the most notable being the shift from AACR2 to Resource Description and Access (RDA) as the new standard developed by the Library of Congress. With the help of Athena Salaba, this text is modified throughout to conform to this new standard"-- \$c Provided by publisher.

- There is no RDA equivalent data element for this tag (MARC tag 610) and subfield codes combination.
- There is no ISBD equivalent data element for this tag (MARC tag 610) and subfield codes combination.

504 Includes bibliographical references (pages 755-769) and index.

- There is no RDA data element associated with MARC tag 504 with no subfield code, but it arguably still falls under Supplementary Content (RDA 7.16) as this is a note on content related to supplementation of the rest of the resource. This would fall under -Note on contents (ISBD 7.7).

505 0_ Part 1. Introduction. Information resource management: description, access, organization -- Foundations, principles, conceptual models, and standards of resource description -- Part 2. Record production and structure, encoding formats, and metadata records. Records and encoding schemas -- Metadata schemas -- Part 3. Resource description and access (RDA). - There is no ISBD equivalent data element for this tag (MARC tag 650) and subfield codes combination.

700 1_ Salaba, Athena, \$e author.

- The RDA data element used in this MARC tag 700 field uses the first indicator (1) combined with the subfield code of \$e to produce the data element of Relationship Designator (RDA 18.5). This is how we arrive at “author” next to the \$e subfield code. This is being used in this context (this MARC tag is for added personal name entries) to state the additional author.
- There is no ISBD equivalent data element for this tag (MARC tag 650) and subfield codes combination.

776 08 \$i Ebook version : #z 9781442232501

- The RDA data element used in this MARC tag 776 field uses the first subfield code of \$i for the element Relationship Designator (RDA 24.5). This data element has the same name but differs from RDA 18.5 in that this element refers to the relationship between this material and another identifier (or this materials’ form and another physical form). The subfield code \$z in this field maps to Related Manifestation (RDA 27.1). In this case, it is the ISBN for the ebook.
- There is no ISBD equivalent for RDA 24.5. However, the closest ISBD data element for RDA 27.1 that is applicable in this context (there are multiple) is -Note on relationship to other resources (ISBD 7.2.4) as it describes a resource related to the resource we are describing.
